ABOUT ME

I am a Land Surveyor turned tech enthusiast driven by the love of coding and problem solving. After 8 years of translating spatial data into visual insights, I discovered that writing code was the most rewarding way to turn ideas into impact. The constant evolution of tools and languages in technology has given me the opportunity to learn and grow everyday.

I excel at communicating complex ideas to stakeholders and thrive in collaborative teams, leveraging meticulous attention to detail to ensure every project is both beautiful and functional. When building applications, I always put the user first—crafting intuitive interfaces and thoughtful interactions. I'm passionate about harnessing data-driven insights, elegant design, and spend extra time refining layouts to deliver a polished final product.

As a career changer, while completing my Grad Cert in Analytics, I discovered the transformative power of raw data, artificial intelligence and full-stack application development, which reignited my passion for technology.

Outside work, I spend time with my daughter, read self-help books, movies, fitness and keep up with AI and broader technology trends.

PROJECTS

E-COMMERCE STORE

E-commerce store selling keyboards with cart functionality built with React, React Router and data from Google Firestore.

GOOGLE BOOKS

Books app made with React featuring API integration, error handling and dynamic filtering options.

TASK MANAGER APP

I built a full stack solution using React/TS, Springboot and mySQL to enable CRUD functions along with Rest Assured testing suite for backend

WORK EXPERIENCE

_Nology | 2025 – CURRENT

Developed & tested a complete interview management domain for a student tracking application, including entity models, service layer with CRUD operations, controller endpoints, and DTOs. Implemented role-based access control allowing admins to create/manage interviews while students can view their assigned interviews. Built with TypeScript, NestJS, and MySQL using MikroORM for database operations

CAF Consulting | Land Surveyor | 2017– 2024

Managed multiple construction projects delivering accurate survey plans and reports within tight deadlines. Trained junior surveyors on best practise, improving team efficiency and output quality.

Central Signs Co | Graphic Designer | 2011 – 2016

Managed client relationships by addressing signage requirements, providing quotes, and ensuring timely delivery of products.

KEY SKILLS

SQL, MySQL,
Nest JS
Java
React & Node.js
Spring Boot

HTML/SASS
JavaScript & React
Typescript
Jest/Vite
Tailwind

EDUCATION

Full Stack Engineer Program
_nology | 2025

Diploma of Surveying
RMIT | 2016

Graduate Certificate in
Professional Data Analytics
Swinburne University | 2023
